## The main objectives of the MoU are given below

- To establish a long-term academic and collaborative partnership based on mutual understanding, cooperation, and appreciation.
- To promote scientific, technological, and environmental awareness among students through lectures by eminent personalities, study sessions, conferences, seminars, and workshops.
- To organize educational visits for students to reputed institutes, research laboratories, industries, and other relevant organizations.
- To create awareness among students regarding the preservation of natural resources, environmental protection, and sustainable development.
- To organize suitable student-oriented programmes on significant National and International occasions such as World Environment Day, National Science Day, World Health Day, and the birth anniversaries of eminent educationists, scientists, and social reformers.
- To conduct lectures, debates, competitions, quizzes, poster presentations, and other academic activities focusing on recent advances in science, technology, environment, and healthcare.
- To organize awareness programmes highlighting the scientific and technological achievements of leading scientific institutions and organizations of the country.
- To conduct various skill development programmes for students in different domains.
- To jointly organize National and International seminars, conferences, workshops, and symposia on issues of contemporary relevance and importance.
- To undertake any other programmes and activities that aligns with the objectives and missions of the collaborating organizations.
- To jointly undertake research projects, consultancy activities, government-funded projects, and other academic initiatives on topics of mutual interest, as mutually agreed upon by both Parties.
- To provide mutual assistance in quality enhancement initiatives aimed at achieving academic excellence and institutional development.
